Introduction

About the IPQ

The IPQ is a well-established questionnaire widely used in the UK.

Since 2004, over 3,000,000 patients have completed an IPQ providing valuable patient feedback to over 4,000 practices and over 16,000 health practitioners, many of these practices and health practitioners having completed the survey on more than one occasion.

Extensive published validation studies have established that the IPQ is a reliable and sensitive tool: accurately measuring patient satisfaction in designated areas and is sensitive to change - if the IPQ is carried out on more than one occasion any change in patient perception of service can be clearly and reliably monitored.

This report outlines the feedback that has been collected and analysed from a sample of your patients. Full explanation on how to interpret this information can be found in the report. We hope that this feedback is useful and a basis for reflection.

A sample of the IPQ questionnaire is included at the end of this report for reference.

About the benchmarks

Benchmarks are a useful guide as to how your practice performed in relation to all the practices who have carried out an IPQ survey. Benchmark data provided relates to either all practices or according to practice list size (the practice list size benchmarks displayed in this report are representative of your practice), as we have established this plays a part in scores achieved. However, it should be noted that other factors such as geographical location and clinical setting may also affect scores and benchmarks may not always be truly representative. Furthermore as it is not mandatory for a practice to carry out an IPQ survey, benchmarks provided are effectively based on data collected from a *volunteer* sample. Volunteer samples often perform better than an 'average' sample which could make the benchmarks provided artificially high.

Your feedback

From the report you will be able to clearly pinpoint areas where you scored well and also those areas where you might feel that improvements may be needed. However, it is advisable to take time to assimilate all the feedback and to avoid scanning the report and noting specific scores on which too much emphasis can be placed. In fact, the clearest reflection of patient satisfaction can often be seen in the frequency and distribution of patient ratings and in their written comments.

A page by page guide to the interpretation of your report has been incorporated in the supporting documentation at the end of this report which you may find useful.

Other useful information

Together with your report you will receive:

- An A4 poster: to enable you to share the results of your local survey with the patients in your practice.
- A 'Guidance template for discussion of local findings and action plan': completion of which may help you meet the requirements of the patient participation directed enhanced services (DES) for GMS contract, if required.

Blank	9	76	71	43	66	71	78	92

*Based on data from 184 practices carrying out 263 surveys between April 2010 and March 2013 with 25 or more responses.

Demographic category mean percentage scores are calculated from all the ratings from all questions for that demographic group.

Please note the reliability of your patient feedback may be marginally reduced if less than 25 patient ratings per category is achieved. In the event that there are less than 5 patient responses for any question, the corresponding score will not be illustrated.

Please see the supporting documents at the end of this report for percentage score calculation and quartile information.

954E

Your patient feedback

All written patient comments have been included in their entirety but details which could identify a specific patient have been removed to ensure anonymity.

Any comments about how this practice could improve its service?

- I am retired, but I think to help people who are working one or two evening surgeries would be helpful.
- An excellent practice - much appreciated.
- Open on Saturdays.
- I really do not have any comments to make as my visit at this time was first class.
- If the previous patient is late more than say 15 minutes they should wait until the doctor is free or reapply. Not just wait in one case for them to arrive 60 minutes late putting all other patients to be inconvenienced.
- Reception area/desk should be more private/confidential. Only moved to this area in last couple of years - am very impressed with service and treatment.
- Appointments (with 3 different doctors) seem rushed. There seems to be an atmosphere of limiting spending as much as possible. Usually a long wait for an appointment with the doctor of choice.
- I would like more access to this doctor when I need to see a doctor. It can be a wait.
- Less waiting time, as car parking fee (fine possible) makes a patient more anxious.
- Lovely practice to visit.
- As good as it gets!
- Update the information on TV screen - offering October flu jab dates in December! Missed appointments again in October (now December).
- Have a clock in the waiting room.
- When in a nurse treatment room I find it (however nicely done) disturbing that sometimes other nurses have to come in for various reasons.
- I feel the support, care and understanding in all areas is excellent.
- None at this time.
- Suggestion: Need a notice pointing out that you can speak confidentially at the window around the corner at reception.
- Compared to where I previously lived for many years, Cornwall is a far better county in which to receive treatment.
- Some receptionists are very bossy and rude.
- Quicker appointment times - can sometimes be quite slow. Quicker time to dispense medicine - waiting times quite long.
- Car parking is an issue! Been told for 5 years that they are 'looking into it' are you? If a particular GP is unsure about making a diagnosis do they have the option to consult other GPs in the practice?
- More appointments at weekend.
- Less waiting times.
- Parking especially in the summer months is difficult, possibly some spaces for doctors patients only.
- It is a pity you do not have a rota, as doctors did in the past, to cover emergency house calls at weekends and nights.
- No significant changes needed. Keep up the good work.
- Wall mounted clock.
- I have always found the reception staff and dispensary staff very helpful and have confidence in all the doctors I have seen.
- Fine as it is.

Your patient feedback

All written patient comments have been included in their entirety but details which could identify a specific patient have been removed to ensure anonymity.

Any comments about how this practice could improve its service?

- It would be good if the practice doctors had a little more time for each patient.
- Sometimes the doctor isn't here due to shortage at the Mevagissey surgery and we lose a surgery doctor, which means we may have only one doctor's surgery for week, which isn't really enough. It would be good if we had 2 surgeries with a doctor in attendance.
- Shorter time of waiting to see a particular doctor.
- If there were programmes on the TV patient would not notice so much if the doctor was running late? Maybe?
- The dispensary staff could be nice, more friendly and more flexible, like the doctors are. Some of the reception staff could also be nicer. I know that some people dread having to speak to them.
- I am very satisfied with the practice. The way - which a duty doctor will ring back in an hour or so is very helpful.
- More opportunities to see a doctor locally and nurse appointments. More continuity of care with your GP.
- Have to wait too long for an appointment in the evening.
- Free car parking it's not fair you have to pay for parking when seeing a nurse or doctor.
- Waiting times improved!
- Either allow more times to see patients or devise another system to cut down waiting time! Open Saturday mornings. The has to 'book an appointment to be ill' to get to see the doctor you want.
- Make appointments arranged better.
- Provide a car park sticker system for patients when appointments are running late.
- I have lived here 26 years and feel very satisfied with the practice.

Your patient feedback

All written patient comments have been included in their entirety but details which could identify a specific patient have been removed to ensure anonymity.

Any comments about how the doctor/nurse could improve?

- This doctor is exceptional.
- No. He is a brilliant doctor.
- I have always had the most utmost confidence in all of the doctors at this time. This means that I do not have any constructive comments at this moment.
- This doctor is excellent.
- Take into account the whole picture - look for prevention not just prescriptions.
- This doctor is one of the best doctors I have had.
- As far as I am concerned these would not be necessary.
- None at this time.
- Nothing at all. Full confidence.
- Sorry to learn this doctor is retiring in March as she will be greatly missed.
- No. She was warm, caring and friendly. Also obviously very experienced and knowledgeable. Felt I was in good and safe hands.
- No, a wonderful doctor whom I will be very sad to see leave next year!
- This was 1st time - but I was quite impressed with her thoroughness and efficiently.
- Would it be possible to have an emergency Saturday clinic?
- No need.
- She couldn't!
- None. Very satisfied.
- Always listened and cared and been supportive. Thank you.
- Unfortunately didn't instil any confidence - seemed to be unsure of my problem maybe wasn't her area of expertise?! Lacked a 'positive personality' sorry, you asked.
- No, all medical practitioners at the surgery provide an excellent service and care.

Supporting documents

Supporting documents

Details of score calculation

The score provided for each question in this questionnaire is the mean (average) value of all of the ratings from all patients who completed the question. It is expressed as a percentage - so the best possible score is 100%.

Example using data from your Q1 Opening hours satisfaction

Total number of patients responses = 154

Questionnaire rating scale	Poor	Fair	Good	Very Good	Excellent	Blank/spoilt
Number of ratings	0	12	35	71	35	1

Value assigned to each rating	0	25	50	75	100	n/a

$$\frac{(\text{number of Poor ratings} \times 0) + (\text{number of Fair ratings} \times 25) + (\text{number of Good ratings} \times 50) + (\text{number of Very Good ratings} \times 75) + (\text{number of Excellent ratings} \times 100)}{(\text{Total number of patient responses} - \text{number of blank/spoilt})} = \frac{(0 \times 0) + (12 \times 25) + (35 \times 50) + (71 \times 75) + (35 \times 100)}{(154 - 1)} = 10,875/153$$

Your mean percentage score for Q1 = 71%

Explanation of quartiles

In statistics a quartile is any one of the three values that divide data into four equal parts, each part represents ¼ of the sampled population.

Quartiles comprise:

- Lower quartile, below which lies the lowest 25% of the data
- The median, cuts the data set in half
- Upper quartile, above which lies the top 25% of the data

Please note that the benchmarks presented in this report are based on data obtained from a volunteer sample of practices, and as such may be artificially high.

Question	Your mean score (%)
Q1 Opening hours satisfaction	71

Benchmark data (%)*				
Min	Lower quartile	Median	Upper quartile	Max
23	64	68	73	92

9541

*Based on data from 927 practices carrying out 1,326 surveys between April 2010 and March 2013 with 25 or more responses.

Supporting documents

Page by page guide to the interpretation of your report

Page 1

The frequency distribution table (table 1) shows the number of patient ratings from poor to excellent and the number of 'blank/spoilt' responses for every question (a blank response is where a patient did not respond to the question and a spoilt response is where more than one tick box option was chosen or if the questionnaire was defaced). If these values are added up, for any one question, this will equate to the total number of patients surveyed (shown in the top right hand corner of the page). This table clearly shows the degree of satisfaction patients have with each aspect of the practice considered. Please note the spread of the ratings. Are they widely spread or closely packed around one or two specific ratings? One or two higher or lower ratings can make a big difference to your mean percentage scores illustrated in tables 2 and 3.

Page 2

The mean percentage score and benchmark table (table 2) illustrates your mean percentage scores for each question calculated from the data in table 1. Each score is the mean (average) score calculated from valid patient ratings (i.e. not the blank/spoilt responses) expressed as a percentage (see score calculation sheet also in the supporting document section of your report). It has been established by our statisticians that the reliability of your patient feedback for any one question may be marginally reduced if less than 25 valid patient responses is achieved (this number can be determined from table 1). In the event that there are less than 5 patient responses, the corresponding score for the question will not be illustrated.

Your scores have been displayed in colour coded boxes to indicate how your score falls within the benchmark data (within the highest 25%, the middle 50% or the lowest 25% of all the mean percentage scores achieved by all practices in the benchmark sample). The provenance of the benchmark data is provided in the footer below the table.

Graph 1 illustrates your mean percentage scores in ascending order of performance with benchmark means from all participating practices.

Page 3

Table 3 and graph 2 are the same as for page 2, but with benchmarks provided relevant to your practice list size. Evidence indicates that practices with smaller list sizes tend to perform better than those with larger list sizes.

Page 4

Table 4 shows the number of patient responses from each 'demographic' group detailed on the questionnaire i.e. age, gender, if the patient saw their usual practitioner or not and the number of years attending the practice. Demographic category mean percentage scores are calculated from all the ratings from all questions for that demographic group. Associated benchmark mean scores relevant to your practice list size are also provided.

The same criteria concerning reliability of the feedback as explained in Page 2 above applies.

Page 5

Patient comments usually reflect scores achieved. The IPQ was designed to simulate the patient's chronological journey through their visit to the practice. Although the questions in the IPQ are generic, comments can pinpoint specific issues identified by the patient from any part of this journey. If there is a particular problem within the practice e.g. getting through in the morning on the telephone or the lack of chairs in the waiting room suitable for the elderly, this can be clearly picked up in the themes and frequency of comments.

In order to ensure patient anonymity, any personal identifiers are removed. In the unlikely event that we receive a written comment which might relate to serious professional misconduct (e.g. allegations of sexual assault), the comment would be referred to our Clinical Associate who would discuss the matter with you.

Improving Practice Questionnaire

OFFICE USE ONLY	Org ID
	Survey ID
	Practitioner ID

You can help this general practice improve its service

- This practice would welcome your honest feedback
- Please read and complete this survey after you have seen the
- All the information provided by patients is put together in a report for the practice. Your answers will not be identifiable. Any comments you make will be included but all attempts will be made to remove information that could identify you.
- Once completed, please return this survey to reception in the envelope provided

Please mark the box like this with a blue or black ball-point pen. If you change your mind just cross out your old response and make your new choice.

When giving your feedback, please only consider the consultation you have had today.
